Brief History

- Sep 2015: HLEG report on EOSC

- Aug 2016: Communication 178: European Cloud Initiative
  - EOSC: the European Open Science Cloud
  - EDI: the European Data Infrastructure
    - Development and deployment of large-scale EU HPC, data and network infrastructure
  - Widening access & building trust

  These are the three pillars of ECI

- Oct 2017: EOSC Declaration

- Nov 2018: EOSC launch event

EOSC Aim

- Trusted environment with free, open services for data storage, management, sharing, analysis and re-use across scientific disciplines

- Federation of existing and emerging horizontal and thematic data infrastructures

- Help to make data open by default (with goFAIR)

- Solving the key challenges:
  - Data inter-operability
  - Fragmentation and lack of coordination (disciplines and countries)
  - Insufficient capacity (computing, storage, connectivity)

Key commitments

1. Governance

Management and long term financing

Widen user-base to public-services, Industry and EU-13

2. Content (open data)

Make Open data default from H2020 onwards

3. (Open data) Infrastructure

Connect key EU RIs (ESFRIs)

Consolidate/Federate data infrastructures

HPC   (Big) Data storage   High speed connectivity

EOSC Roadmap

Governance
- Member states and EC (strategic)
- Executive Board (operational)
- Stakeholder forum (advisory)

Architecture – EOSC stage 1 in 2020
- Core data & services through an EOSC-Hub
- Catalogues of data & services
- Rules of participation/engagement
- EOSC Portal as a universal entry point
- FAIR data and action plan

Financing – stage 1/stage 2
- H2020 – RI, WP2018-2020
- EOSC Business model for long term sustainability

EOSC Roadmap (H2020 calls)

Basic Architecture in EOSC-Hub

EOSC-hub

Competence Centers

- Competence Centre
- Competence Centre

Community-specific services

- Thematic Service
- Thematic Service
- Thematic Service

Federation Services

AAI, Accounting, Monitoring, Operations, Security Coord.

Added Value Services

Compute, Data, Software Management and Preservation

Compute and Storage

Collab. Services

Application Repository, Configuration Management, Marketplace

Common services

Thank you for your attention
